The Weather Report is a powerful and moving short film by artist Jill Impey. The film records the voices of women from coastal, immigrant and creative communities in New Zealand and England. The women reflect on their relationships with heritage and feelings about the weather, the sea, migration and colonisation.

A post-screening workshop with Lucida (Jill's fictional historical character) invites you to take inspiration from the film, use creative practices to boost wellbeing and explore what being a good ancestor means to you.
